ABOUT ME

I'm an upcoming graduate who became drawn to Software Development while learning about Cloud Computing. I've dedicated myself to absorbing all the knowledge I can about web development, cloud services (AWS), and tying it all in with my IT knowledge. Actively looking for associate / junior opportunities.

Check out my portfolio at www.lopezalex.com where you can see my projects live and what I can do!

PROJECTS

Cinema Pro | See Website

Utilizes the Movies DB API. Tools used were primarily React, JavaScript, HTML, CSS, and Amazon Web Services (AWS).

Landscaping Company | See Website

Client website created for a local Landscaping Company! Responsive and connects to an email server to send to the client. Tools used include HTML, CSS, Bootstrap, and Font-Awesome.

Cinema Pro | See Website

Utilizes the Movies DB API. Tools used were primarily React, JavaScript, HTML, CSS, and Amazon Web Services (AWS).
