EDUCATION

Bachelor of Science
Information Technology

Arizona State University
2016 – May 2020

SUMMARY

Recent ASU graduate looking for associate / junior opportunities. I have dedicated my time to learning full-stack software development and would love a chance to bring value to your team as I continue to learn and grow as a developer.

PROJECTS

Bug_Tracker | See Live

Full-Stack Java Spring Web Application for ticket/project management
- Used industry relevant practice/development in Spring 5 and Java 8
- Integrated Thymeleaf and used Spring data to integrate JavaScript
- Implemented Spring MVC, CRUD Repositories, Hibernate, and PostgreSQL
- Learned about and implement Spring Security, as well as the basics of RESTful Web Services API
- Production level deployment in AWS EC2 and Docker containerization

Cinema Pro | See Live

A React application to browse your favorite movies and shows
- Tools used were React, JavaScript, and SASS
- Hosted on AWS Amplify's serverless architecture
- Implemented the Movie DB API queries to show relevant information
- Fully responsive web application design

Landscaping Company | See Live

A client website I created for a local Landscaping Company
- It is completely responsive and connects to an email server to send to the client, Hosted on Amazon S3
- Front-end tools used: HTML, CSS, Bootstrap, and Font-Awesome

TECH STACK

Languages

Java | JavaScript ES5/6/7 | HTML5
CSS3 | SQL | PostgreSQL

Libraries and Frameworks

Spring 5 | React | Spring Boot
Bootstrap | Maven | JSON
Spring MVC | Hibernate

Tools

AWS | Linux | VMWare | Git
Docker | IntelliJ

EXPERIENCE

Underwriter
2015 - Present

Lincoln Heritage Life Insurance   Phoenix, AZ

Audits, reports, quality assurance, training, and providing feedback to team members. Develop UI sections using HTML/CSS to display relevant information to associates on internal intranet. Processing and approving of life insurance policies.

Tech Support
2015 - 2015

Grand Canyon University   Phoenix, AZ

Provided technical support for online / on-campus students. Dealt primarily with online / browser "Student Portal" troubleshooting and servicing. Provided additional support with software usage such as Adobe, Microsoft, and Operating Systems
